ON THE CORE FINDING

"AI systems can recognize emotion and still behave unsafely once vulnerability deepens."

ON WHY BENCHMARKS FAIL

"Most benchmarks test whether AI understands emotion. Very few test whether it remains safe over time."

ON THE EI PROTOTYPE

"The difference wasn't expressiveness — it was consistency."

ON THE SAFETY GATE

"Starting safe is not the same as staying safe."

ON SCOPE

"These findings describe behavioral patterns under test conditions, not real-world outcomes."

ON THE GAP

"Emotional capability without behavioral stability introduces risk at scale."

ON METHODOLOGY

"This benchmark evaluates how AI systems behave under emotional load — not just whether they recognize emotion."
